

Workflow Configuration Best Practice

Streamlining Complexity Through Best Practice Solutions™ + Intelligent Automation

Modern enterprises operate on a patchwork of workflows—each carrying its own rules, exceptions, and risks. Soltec, in partnership with Manch Technologies, transforms this fragmentation into a unified, intelligent, and compliant process ecosystem.

The Manch Centralized Orchestration Platform

A no-code, AI-powered process configurator that allows business users to design, deploy, and manage workflows—without writing a single line of code. Its drag-and-drop interface, embedded Governance, Risk & Compliance (GRC) engine, and prebuilt automation components enable organizations to **standardize complex processes in days, not months**.

From HR onboarding to financial approvals, vendor settlements, or field operations, Manch eliminates manual coordination, accelerates approvals, and embeds compliance directly into each step. Soltec ensures the alignment of **people + process + governance**, ensuring adoption and scalability across departments and regions.

Soltec + Manch Value Proposition

Transforming traditional workflow challenges into streamlined, intelligent solutions.

Challenge	Traditional Approach	Soltec x Manch Solution
Fragmented processes and manual routing	Custom-coded workflows across multiple systems	Unified, no-code configuration with reusable templates
Compliance and audit gaps	Separate GRC modules, manual evidence collection	Built-in compliance engine with automated audit trail
IT bottlenecks	Reliance on developers and long change cycles	Empowered business users with controlled, role-based editing
High cost of ownership	Multiple vendors and integration points	Single, scalable platform that lowers TCO

Impacts and Benefits

Accelerated Time-to-Value
Launch fully configured workflows in weeks instead of months.

Built-in Compliance
GRC engine ensures regulatory adherence and secure, auditable process trails.

Reusable Templates
Preconfigured blueprints for HR, finance, operations, and vendor workflows.

Empowered Teams
Business users manage process logic independently with minimal IT support.

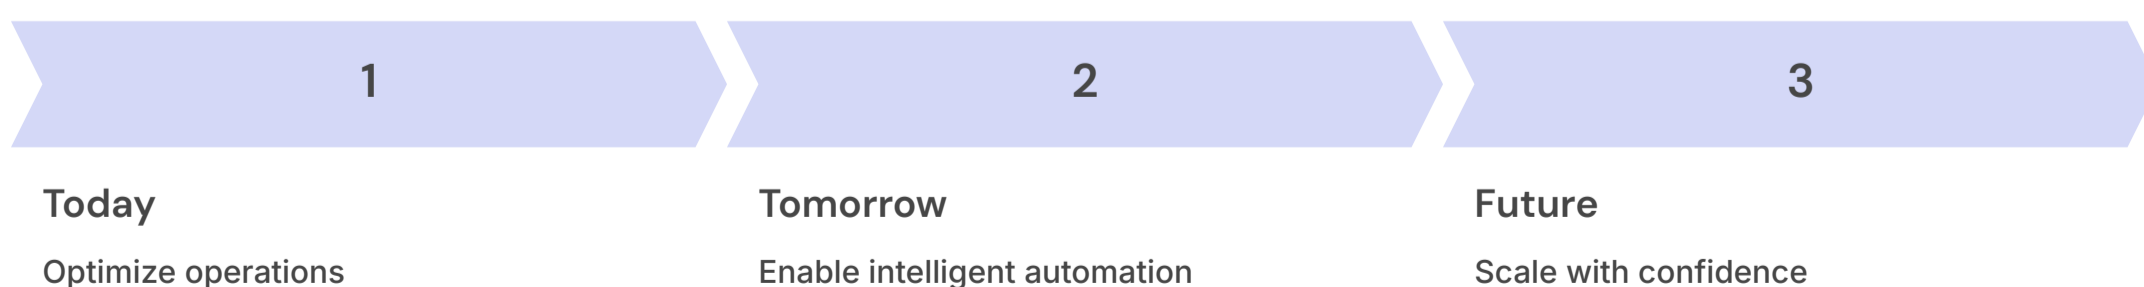

Reduced Total Cost of Ownership
Consolidate multiple tools into one intelligent platform.

Why It Matters

Process inefficiency is one of the top barriers to AI readiness. By configuring workflows on Manch, organizations not only optimize today's operations—they build the **foundation for intelligent automation and data integrity** tomorrow.

Soltec's Best Practice Solutions™ ensure transformation happens quickly, securely, and sustainably.
